

It's become a taboo word to say about me

Everything, from

- ① submitting all kinds of official documents,
- ② playing multiple instruments and composing (only AnMeiden for now),
- ③ participating in multiple sports,

etc.

I often watch YouTube videos, and all of the domestic videos from the last six months (I've checked the dates of the videos)

include whispered conversations in the Diet,
and videos and live broadcasts from event venues.

I always hear people talking behind me,"

I'm objective and calm,

so I don't think it's an auditory hallucination, nor are the words I hear due to my self-conscious personality.

If it is an auditory hallucination, then I have no choice but to call the voices I hear around me when I go out for a short while an auditory hallucination,
and the fact that I'm comparing it to other similar events supports my objective and calm thinking.

surely

① **The word "Ai ***"**

Lately

② **Name of the person who said "Don't panic, don't panic"**

③ **Someone from Tokyo**

④ **AV**

I can hear it well,

I have also listed my works below, so please take a look.

Please say That's right

However, since absolutely nothing about me has been mentioned publicly,

I can't help but think that this has become a taboo subject...
